

Human-Computer Interaction

CSCW

Professor Bilge Mutlu

Today's Agenda

- » Topic overview: *CSCW*
- » Discussion
- » Project Activity: *Determining Method, Continued*

Topic overview: CSCW (Part 1)

What is CSCW?

What is CSCW?

Definition: CSCW "combines the understanding of the way people work in groups with the enabling technologies of computer networking, and associated hardware, software, services and techniques."¹

What is groupware?

Definition: Groupware includes application software designed to help people working on a common task to attain their goals.²

¹Wilson, 1991, Computer Supported Cooperative Work: An Introduction

²Wikipedia: Groupware

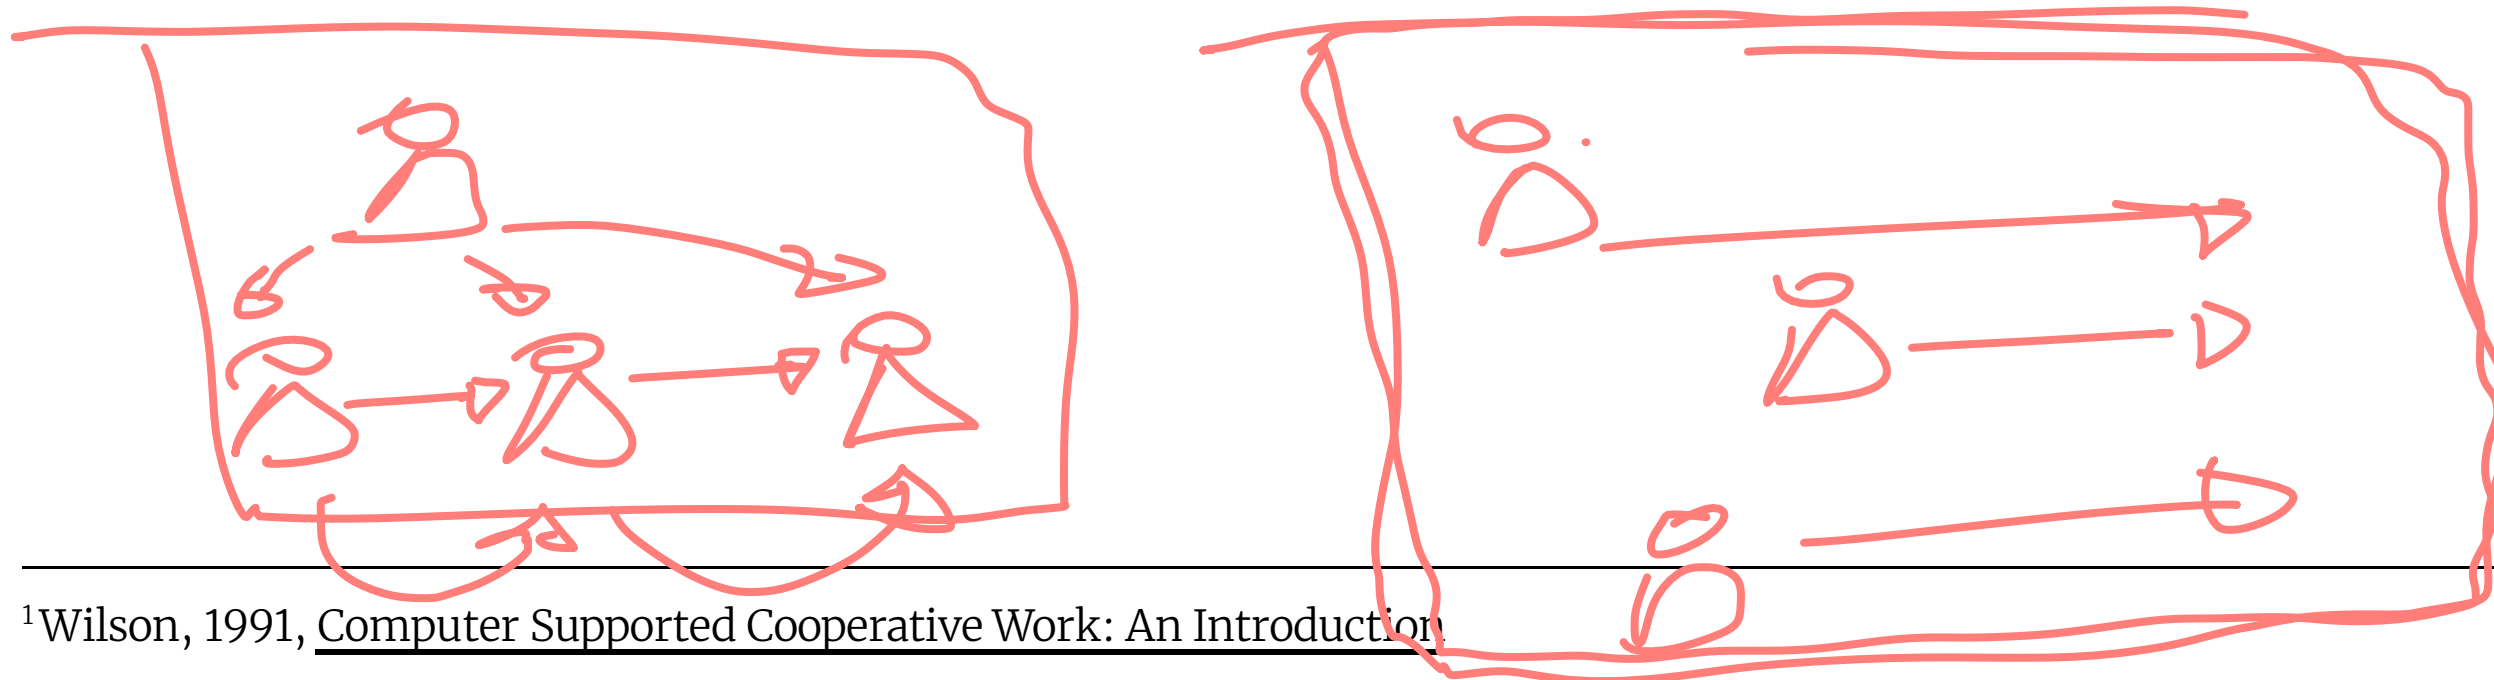

CSCW = the group working process + the technology¹

¹Wilson, 1991, Computer Supported Cooperative Work: An Introduction

What do you mean by group work processes?

1. Individual human characteristics, e.g., conversation patterns
2. Organizational aspects, e.g., structure and culture of the organization
3. Group work design issues, e.g., involvement in the work design process
4. Group dynamics, e.g., group decision making, collaboration¹

¹Wilson, 1991, Computer Supported Cooperative Work: An Introduction

What do we mean by CSCW technology?

1. Communication mechanisms—enabling people to communicate, e.g., videoconferencing — Zoom
2. Shared work space facilities—enabling people to view and work on the same electronic space, e.g., screen sharing — Zoom
3. Shared information facilities—enabling people to view and work on a shared set of information, e.g., cloud-based document sharing — Canvas — Google Docs
4. Group activity support facilities—augmenting group work processes, e.g., simultaneous document editing¹

¹Wilson, 1991, Computer Supported Cooperative Work: An Introduction

Time/space Groupware Matrix³

Synchronous

Asynchronous

Collocated

Face-to-face interactions

Decision rooms, single display groupware, shared table, wall displays, roomware

Continuous task

Team rooms, large public display, shift work groupware, project management

Remote

Remote interactions

Video conferencing, instant messaging, chats/MUDs/virtual worlds, shared screens, multi-user editors

Communication + coordination

Email, bulletin boards, blogs, asynchronous conferencing, group calendars, workflow, version control, wikis

GitHub

³Johansen, 1988, Groupware: Computer Support for Business Teams

Face-to-face interactions⁴

Right: group decision rooms (e.g., NASA Mission Control Center, Johnson Space Center)

Manufacturing
Crew operations
Transportation
Hospital

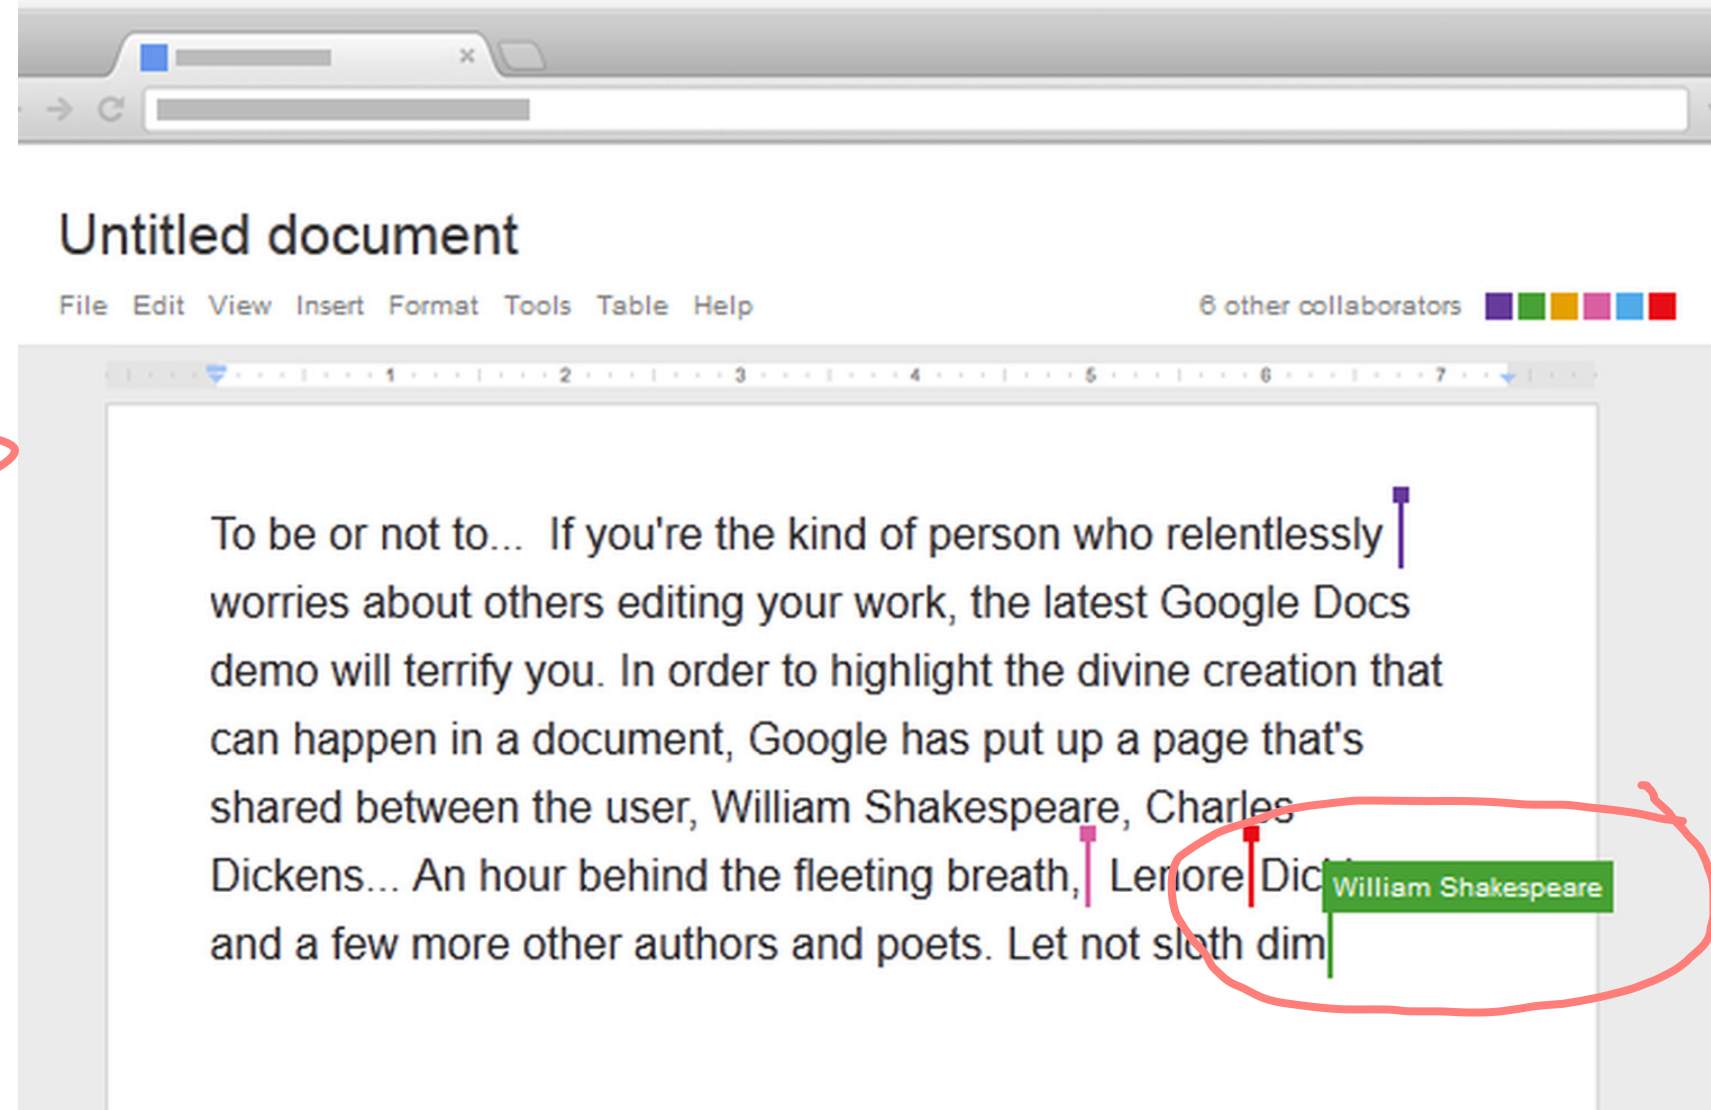

⁴Image source: [NASA](#)

Remote interactions⁵

Right: collaborative authoring in Google Docs

Next slide: different forms of videoconferencing

⁵Image sources: Right, Next slide, left, Next slide, right

Continuous task⁶

Right: persistent project management displays

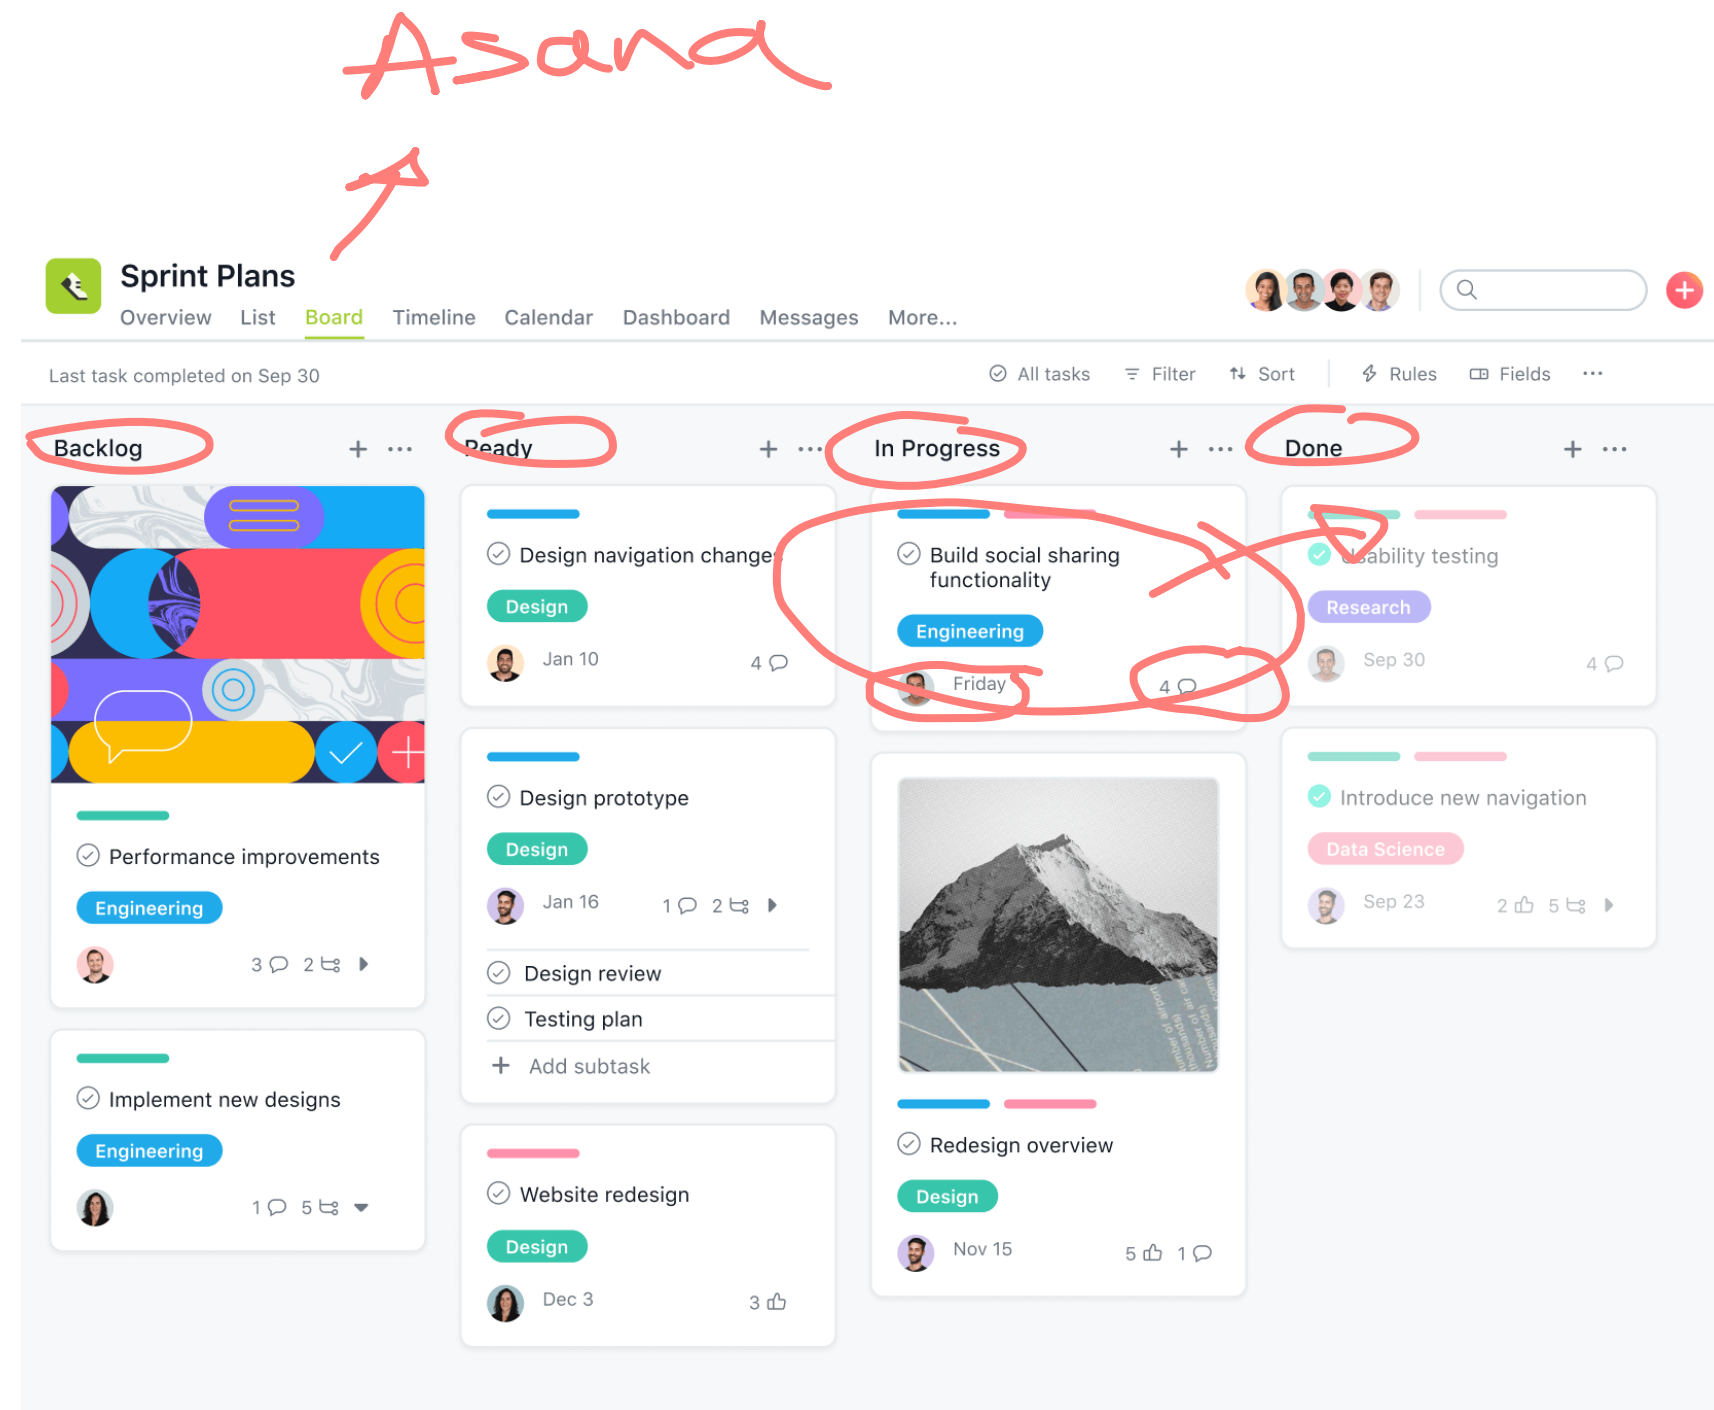

⁶Image source

Communication + coordination⁷

Right: project management software tools

CSCW, Part 2: Crowdsourcing

» Part 1: CSCW (this week)

traditional group work

» Part 2: Crowdsourcing (next week)

non-trad. work

Discussion Questions

- » What are some of the groupware systems are we using for this class? How would you categorize them?
- » What are examples of the challenges that Grudin highlighted you see in today's groupware?
- » What principles do you see carried over to non-work contexts?
- » What relevant external resources have you found?
- » ...

Project (Check-in)

Determining Method (continued)

Feasible research templates:

- » *Nascent theory* → Ethnography, Grounded Theory to build new theory
- » *Mature theory* → Experimental study extending/testing existing theory
- » *Artifact* → New system/extension, preliminary evaluation with users

Determining Method (continued)

Research contexts:

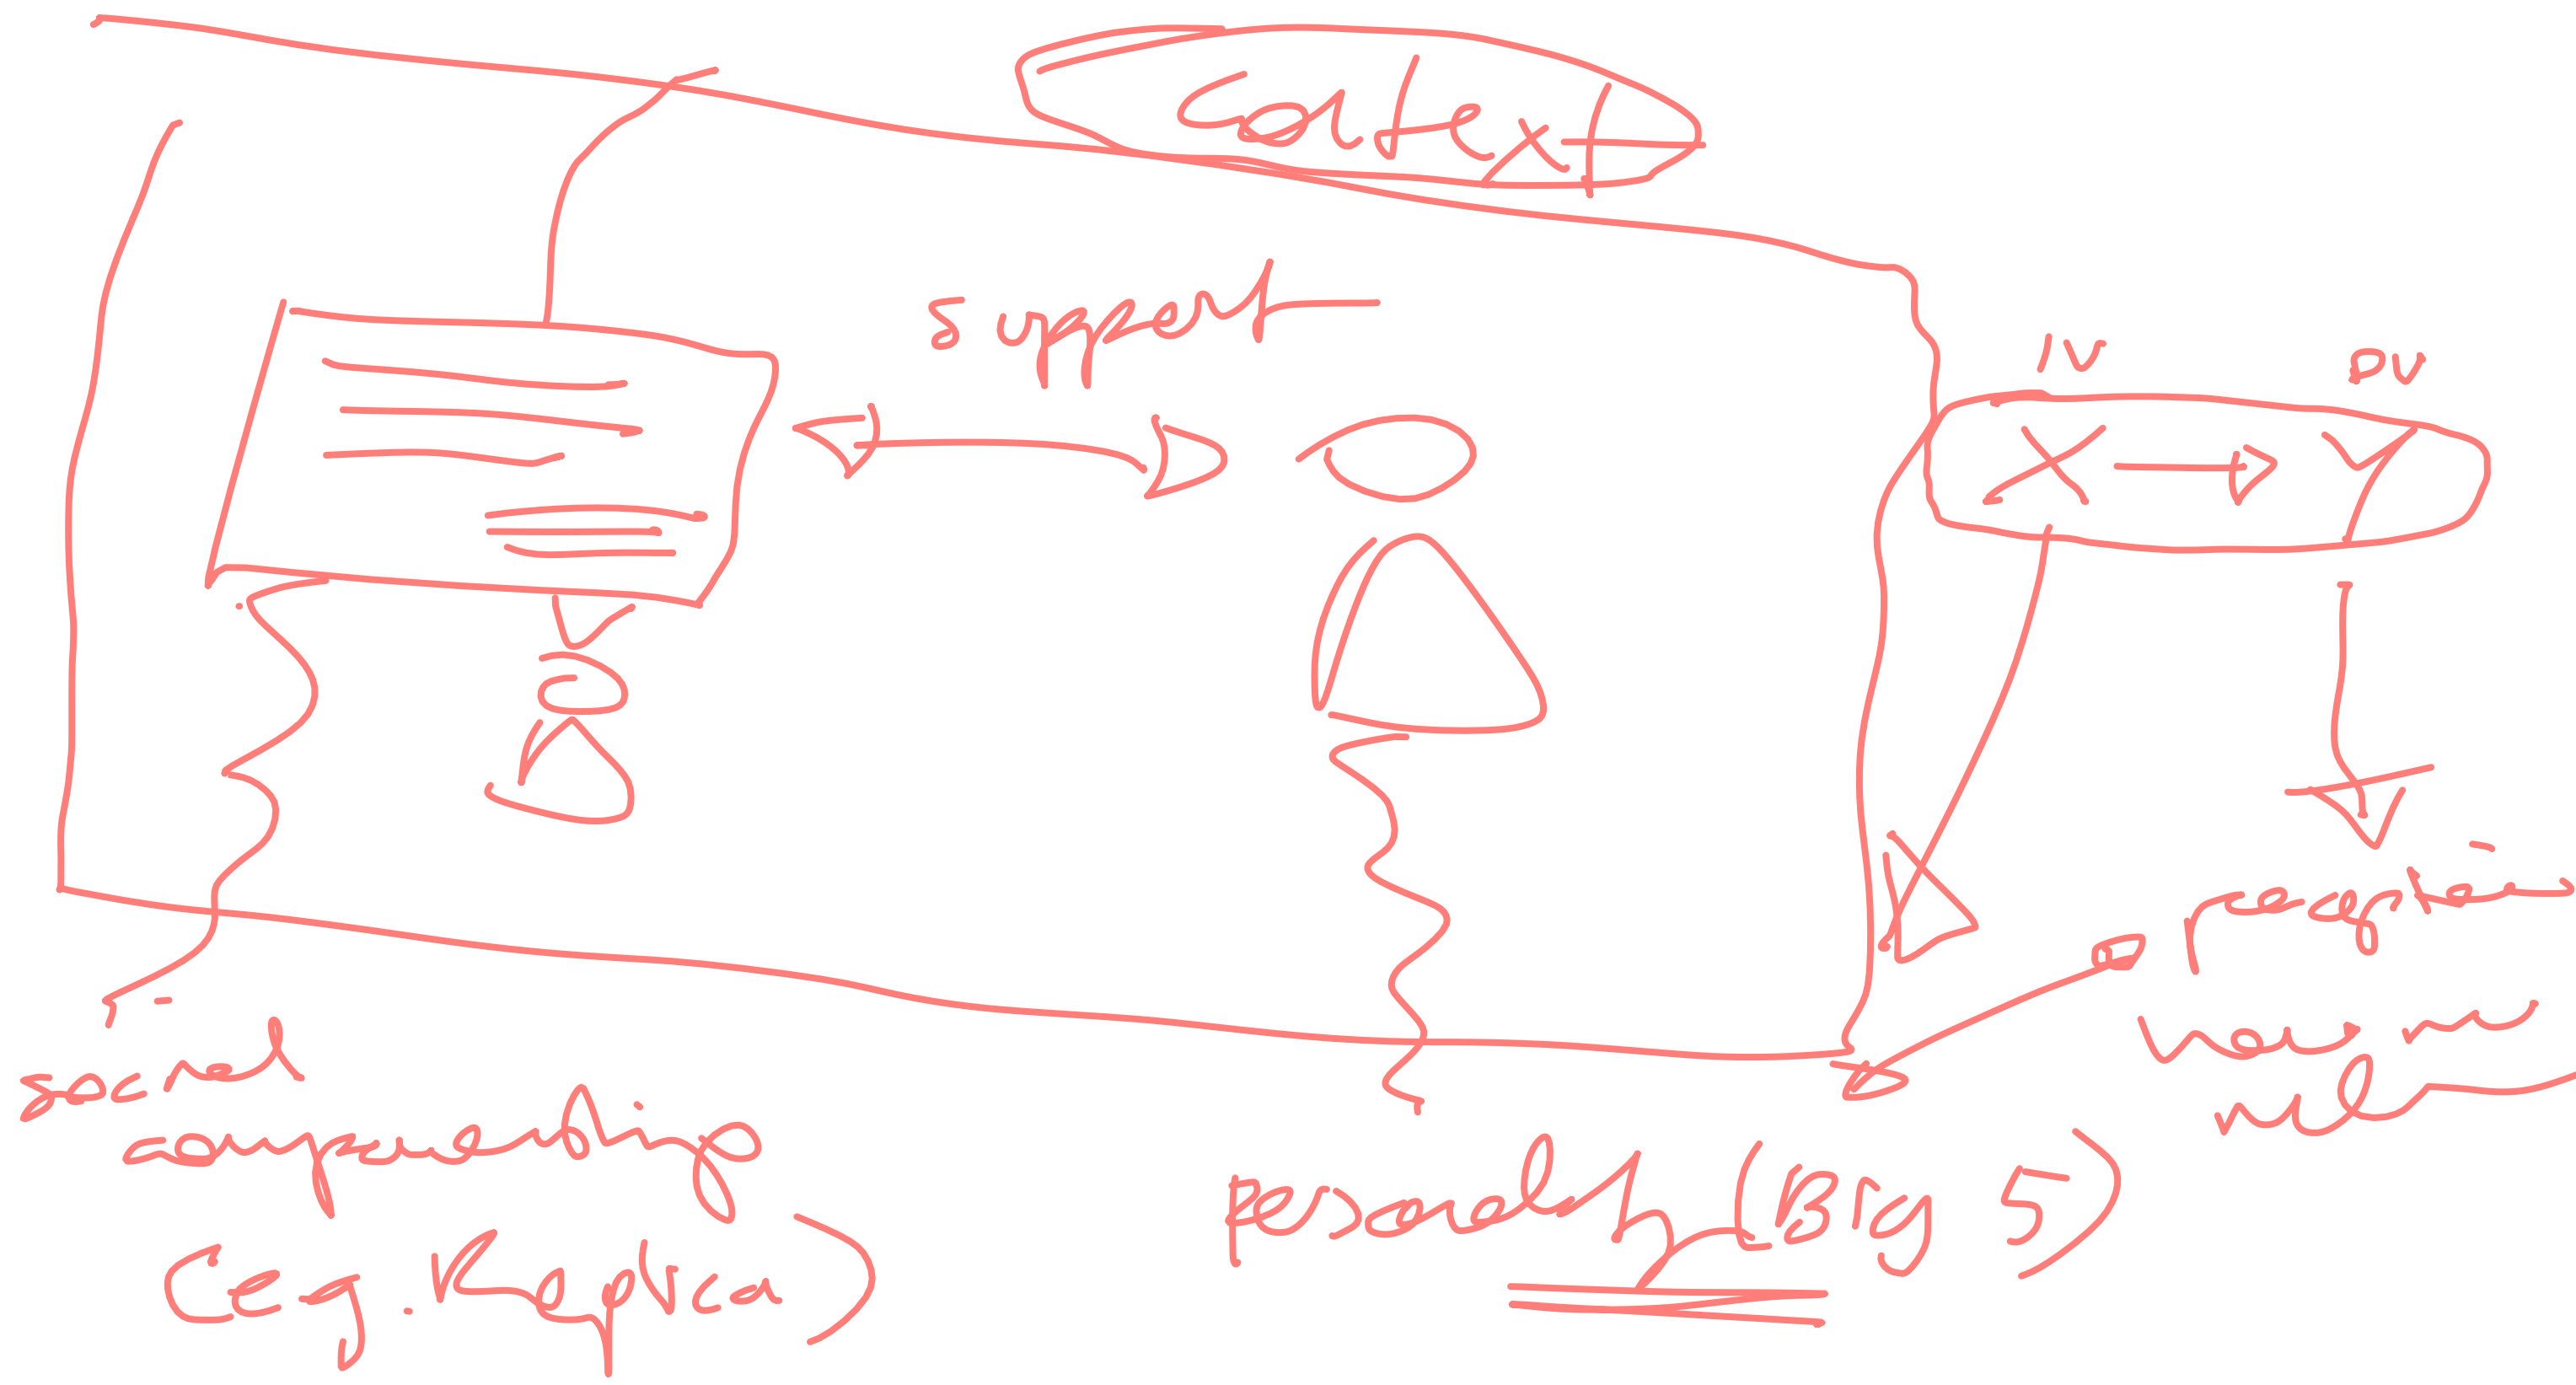

- » **In-person:** studying phenomena in the real world
- » **Virtual:** studying online phenomenon
- » **Online:** using online methods to study phenomenon in the real world

Deliverables

Nov 1 → Due date for your method description (you have 2 weeks)

What is expected?

- » A description of your method
- » All your "study materials" must be ready
 - » *Ethnography* → Site identification, permissions, etc.
 - » *Experimental study* → Materials, instruments, surveys, etc.
 - » *Artifact* → Design requirements, preliminary evaluation plan, etc.

Context

support

social computing
(e.g. Replika)
